Ebie Chukwuma Ewere - Software Engineer

Lagos, Nigeria caleb42.codes@gmail.com LinkedIn

I am an adept problem solver with a desire to rid the world of inefficiency using algorithms. My current superpower is programming and I find great delight in authoring real-world inspired features. I am an excellent team player and a strong believer in Modular programming.

Mobile
Flutter/Dart - 2 year experience

Backend
Node - 3 years experience
C# .net - 1 year experience

Work Experience

Software Engineer - United Bank for Africa. Lagos, Nigeria. 01/2020 - present

Flutter/Dart and Nodejs
I'm working with teams within the bank to create mobile applications using the flutter framework for consumer and account holders.

VueJs and C#/ASP.NET Core
Created web applications to automated bank processes and reduce the paper usage within the bank. Implemented a central Authentication system used by most applications within the bank to handle dynamic user access and 2Factor Authentication.

Software Engineer - Andela. Lagos, Nigeria. 06/2019 - 09/2019

React/Redux, TailwindCSS, Express, Postgres, and Node

I worked with a team on a Blog Application that gives users the chance to create and publish articles. I included a feature that enabled authors to add images to their articles using the Cloudinary service.

Software Engineer - Webplay. Benin, Nigeria. 02/2018 - 03/2019

Electron, Angular, SASS, PHP, and MySQL

I made a Pharmaceutical application (available on the interview) that enables pharmacies to keep account of their stocks and sales activities within a store. I implemented a feature in the application that makes drugs with expiry date closest to “today” to get sold first by creating an algorithm that pushes drugs like such to the top of the stock list, this prevents expired drugs from getting sold. I also created a means of printing using either EPSON or A4 printers

Software Engineer - L’operateur Nigeria. Lagos, Nigeria. 05/2015 - 11/2017

Android Java

Worked in a team to create an Android Study Application that enables users to view past questions for JAMB & PostUTME and take a test. The app has over 10,000 downloads on Google play store

SIDE-GIGS

Next Js, Redux, MaterialUI

I Created a Money transfer application MVP for a client that allows transfers between Nigeria and UK.
The app integrates stripe and other payment services to neatly provide users with a seamless experience

HOBBIES

Reading, gaming, and constructive conversations
